PROFESSIONAL SUMMARY

QA Automation Engineer with 7.6 years of overall professional experience including 4+ years in Manual and Automation Testing and 3.5 years in Data Annotation projects. Experienced in Web, Mobile and API Automation using Java, Selenium WebDriver, Playwright (JavaScript/TypeScript), Appium, REST Assured and Postman. Skilled in designing Page Object Model (POM), Hybrid and Data Driven Automation Frameworks using TestNG, Cucumber BDD and Apache POI. Hands-on experience with Jenkins CI/CD, Git, GitHub, Maven, Extent Reports, Agile Scrum, SDLC and STLC. Strong background in regression, smoke, sanity, cross-browser, cross-platform and functional testing with a focus on quality engineering and automation-first delivery.

TECHNICAL SKILLS

- Languages: Java, JavaScript, TypeScript
- Automation: Selenium WebDriver, Playwright, Appium
- Frameworks: TestNG, Cucumber BDD, Page Object Model (POM), Hybrid Framework, Data Driven Framework, Apache POI
- API: REST Assured, Postman, REST API Testing
- Performance: JMeter
- CI/CD: Jenkins
- Version Control: Git, GitHub
- Build: Maven
- Reporting: Extent Reports, Allure Reports
- Methodologies: Agile Scrum, SDLC, STLC

PROFESSIONAL EXPERIENCE

QA Automation Engineer (QA Tester) | Pacecom Technologies Pvt. Ltd. | May 2022 – Present

- Designed and maintained Selenium WebDriver automation framework using Java, TestNG, and POM.
- Developed Data-Driven and Hybrid frameworks using Apache POI.
- Automated Web, Mobile, and API test scenarios using Selenium, Appium, Playwright, and REST Assured.
- Integrated automation suites with Jenkins CI/CD pipelines.
- Executed cross-browser, regression, smoke, sanity, and functional testing.
- Participated in defect triage meetings, verified bug fixes, and supported regression testing for sprint releases.
- Investigated automation failures, performed root cause analysis, and enhanced test scripts to improve execution stability.
- Collaborated with developers, business analysts, and product owners in Agile Scrum teams.
- Managed source code using Git/GitHub and generated Extent Reports.

PROJECTS

Healthcare Monitoring Application (ASHURITY)

Healthcare platform supporting ROC, SOC, Doctors, Laboratory Professionals and, Caretakers.

- Automated Login, User Management, Role Mapping and Alerts.
- Validated Vitals, Laboratory, Pharmacy, Emergency and Video Consultation workflows.
- Performed API validation, regression, smoke and mobile automation.
- Environment: Java, Selenium, TestNG, Cucumber BDD, Maven, Jenkins, Git, Postman, Appium, Jira.

Pocket Parcel Application

- Parcel delivery application that enables users to create shipments, choose courier partners, make payments, and track deliveries.
- Developed UI automation using Playwright (JavaScript/TypeScript) for login, order creation, carrier selection, payment, and tracking workflows.
- Performed Mobile Automation using Appium and validated REST APIs using Postman.
- Executed Functional, Regression, Smoke, and Cross-Browser testing.

Campus2Community | MYEDUPORT | MYPORTAL Applications (Manual Testing)

- Performed end-to-end manual testing by designing and executing test cases based on business and functional requirements across multiple web applications.
- Executed Smoke, Functional, Regression, Integration, and UI testing to validate user authentication, role-based access, profile management, dashboards, and business workflows.
- Identified, documented, tracked, and verified defects using Jira, collaborating closely with developers to ensure timely resolution and successful releases.
- Conducted re-testing, regression validation, cross-browser testing, and verified business rules, data integrity, and application stability before deployment.

PREVIOUS EXPERIENCE

Project Lead | Team Lead | Reviewer | Annotator (Nov 2018 – Jan 2022)

- Managed teams of 20+ members across multiple Data Annotation projects.
- Reviewed annotation quality and ensured adherence to client guidelines.
- Coordinated project delivery while maintaining 98%+ quality standards.

ACHIEVEMENTS

- Automated 100+ UI test scenarios, reducing manual testing effort by approximately 40% through automation framework enhancements.
- Integrated CI/CD execution using Jenkins.
- Improved release quality through early defect detection.

EDUCATION

B.E. in Electronics and Communication Engineering (2016)
