

MANOJ S

QA Automation Engineer | SDET

Bangalore, India | +91 8179054207 | manojnsreenivas95@gmail.com | linkedin.com/in/manojsenji

PROFESSIONAL SUMMARY

QA Automation Engineer with 7.6+ years of overall professional experience, including 4+ years in Manual and Automation Testing and 3.5 years leading Data Annotation projects. Specialized in **Playwright (JavaScript/TypeScript)** for Web, API and cross-browser/cross-platform automation, with additional hands-on expertise in Selenium WebDriver (Java), Appium for mobile automation, and REST Assured / Postman for API testing. Skilled in designing scalable **Page Object Model (POM)**, Hybrid and Data-Driven automation frameworks using TestNG, Cucumber BDD and Apache POI, and integrating suites into **Jenkins CI/CD** pipelines. Strong background in regression, smoke, sanity and functional testing with an automation-first mindset focused on delivering stable, maintainable and fast-executing test suites.

CORE PLAYWRIGHT EXPERTISE

- **Framework Design:** Building Playwright Test Runner projects from scratch using JavaScript/TypeScript with Page Object Model (POM) architecture
- **Cross-Browser Testing:** Executing automated tests across Chromium, Firefox and WebKit engines, and cross-platform runs (Web, Mobile via Appium)
- **API Automation:** Validating REST APIs using Playwright's built-in request context, REST Assured and Postman
- **Test Reliability:** Applying Playwright's auto-waiting, web-first assertions and retry mechanisms to eliminate flaky tests
- **Debugging & Reporting:** Using Trace Viewer, screenshots, video capture, Allure Reports and Extent Reports for fast root-cause analysis
- **Parallel Execution:** Configuring parallel test execution and test sharding to speed up CI feedback loops
- **CI/CD Integration:** Integrating Playwright suites into Jenkins pipelines for continuous, automated regression runs
- **Data-Driven Testing:** Building data-driven and hybrid test flows using Apache POI-based external data sources

TECHNICAL SKILLS

- **Automation Tools:** Playwright, Selenium WebDriver, Appium
- **Languages:** JavaScript, TypeScript, Java
- **Frameworks:** Playwright Test (Native Runner), Page Object Model (POM), TestNG, Cucumber BDD, Hybrid Framework, Data-Driven Framework, Apache POI
- **API Testing:** REST Assured, Postman, Playwright API Testing, REST API Testing
- **Performance Testing:** JMeter
- **CI/CD:** Jenkins
- **Version Control:** Git, GitHub
- **Build Tools:** Maven
- **Reporting:** Extent Reports, Allure Reports, Playwright HTML Reporter, Trace Viewer
- **Methodologies:** Agile Scrum, SDLC, STLC

PROFESSIONAL EXPERIENCE

QA Automation Engineer (QA Tester)

May 2022 - Present

Pacecom Technologies Pvt. Ltd.

- Designed and maintained UI, API and mobile automation suites using Playwright (JavaScript/TypeScript), Selenium WebDriver (Java), Appium and REST Assured within a Page Object Model (POM) architecture.
- Built and enhanced Data-Driven and Hybrid automation frameworks using Apache POI for external data-driven test execution.
- Automated Web, Mobile and API test scenarios, leveraging Playwright's auto-waiting and web-first assertions to reduce flaky test failures.
- Integrated automation suites with Jenkins CI/CD pipelines for continuous, on-demand and scheduled regression execution.
- Executed cross-browser (Chromium, Firefox, WebKit), regression, smoke, sanity and functional testing cycles.
- Investigated automation failures using Playwright Trace Viewer and execution logs, performed root cause analysis, and enhanced scripts to improve execution stability.
- Participated in defect triage meetings, verified bug fixes, and supported regression testing for sprint releases.
- Collaborated with developers, business analysts and product owners in Agile Scrum teams.
- Managed source code using Git/GitHub and generated Extent Reports for stakeholder visibility.

PROJECTS

Pocket Parcel Application

Playwright Automation

- Parcel delivery application enabling users to create shipments, choose courier partners, make payments, and track deliveries.
- Developed UI automation using Playwright (JavaScript/TypeScript) with POM for login, order creation, carrier selection, payment and tracking workflows.
- Used Playwright's built-in request context and Postman to validate REST APIs supporting the shipment workflow.
- Performed mobile automation using Appium, and executed Functional, Regression, Smoke and Cross-Browser testing.

Healthcare Monitoring Application (ASHURITY)

Healthcare platform supporting ROC, SOC, Doctors, Laboratory Professionals and Caretakers.

- Automated Login, User Management, Role Mapping and Alerts modules.
- Validated Vitals, Laboratory, Pharmacy, Emergency and Video Consultation workflows.
- Performed API validation, regression, smoke and mobile automation testing.
- **Environment:** Java, Selenium, TestNG, Cucumber BDD, Maven, Jenkins, Git, Postman, Appium, Jira.

Campus2Community | MYEDUPORT | MYPORTAL Applications

Manual Testing

- Performed end-to-end manual testing by designing and executing test cases based on business and functional requirements across multiple web applications.
- Executed Smoke, Functional, Regression, Integration and UI testing to validate user authentication, role-based access, profile management, dashboards and business workflows.
- Identified, documented, tracked and verified defects using Jira, collaborating closely with developers to ensure timely resolution and successful releases.
- Conducted re-testing, regression validation, cross-browser testing, and verified business rules, data integrity and application stability before deployment.

PREVIOUS EXPERIENCE

Project Lead | Team Lead | Reviewer | Annotator

Nov 2018 - Jan 2022

- Managed teams of 20+ members across multiple Data Annotation projects.
- Reviewed annotation quality and ensured adherence to client guidelines.
- Coordinated project delivery while maintaining 99%+ quality standards.

ACHIEVEMENTS

- Automated 100+ UI test scenarios, reducing manual testing effort by approximately 40% through automation framework enhancements.
- Integrated CI/CD execution using Jenkins for continuous automated regression runs.
- Improved release quality through early defect detection across Web, API and Mobile test layers.

EDUCATION

B.E. in Electronics and Communication Engineering (2016)
